|                                                                                                                                                    |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------|----|
| AI-powered Intelligent Control and Assembly of Environmental Water Treatment Materials<br>and Future Prospects.....                                | 1  |
| Wei Zhengwen                                                                                                                                       |    |
| Dielectric Engineering for Enhancing Triboelectric Performance of Nanogenerators.....                                                              | 2  |
| Jin Zhang                                                                                                                                          |    |
| Optimization of Fuel Cell Catalytic Layer for Deep-Sea Carbon Sink Monitoring.....                                                                 | 3  |
| Gang Wu                                                                                                                                            |    |
| Development of an Evaporator-Condenser Heat Exchanger for the Super-Long Gravity Heat Pipe<br>Geothermal Systems .....                             | 4  |
| Abdullah Hassan, Fangming Jiang                                                                                                                    |    |
| Research Status and Prospects of Numerical Simulation of Hydrocarbon Source Rock<br>Development Process.....                                       | 5  |
| Shun Ding, JiangXiu Qu                                                                                                                             |    |
| Effects of External Nutrient Inputs on Phytoplankton and Nutrient Dynamics in the Three Gorges<br>Reservoir Under Extreme Heatwave Conditions..... | 6  |
| Wang Yuke, Zhang Lei                                                                                                                               |    |
| The Driving Effect of Environmental Factors on the Succession of Dinoflagellate Blooms<br>on the Time Scale .....                                  | 7  |
| Luo Tingting, Zhang Lei                                                                                                                            |    |
| Study on the Mechanism of Dinoflagellate Bloom and Water Browning in the Three Gorges<br>Reservoir Area Based on Dinoflagellate Mobility .....     | 8  |
| Cheng Liuming                                                                                                                                      |    |
| Metal-organic Framework-derived Iron Nitride Composites for Rapid Light-Driven Diclofenac<br>Degradation via Persulfate Activation.....            | 9  |
| Md Abul Hossain, Won Sik Shin                                                                                                                      |    |
| Early Detection of Hydrate-Induced Pipeline Blockage in Offshore Energy Systems Using LFM<br>Acoustic Reflection Monitoring .....                  | 10 |
| Yang Meng, Yongchen Song, Lunxiang Zhang                                                                                                           |    |
| Research on Factors Influencing the Acoustic Properties of Seafloor Sediments.....                                                                 | 11 |
| Jiang Yongjun, Zou Dapeng, Sun Han, Xiao Tingbing                                                                                                  |    |

|                                                                                                                                                                      |    |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| Experimental Investigation of Combustion and Emission Characteristics of a Heavy-duty<br>Direct-injection Hydrogen Engine with Active and Passive Jet Ignition ..... | 12 |
| Hao Lin, Bowen Wang, Weijun Lin, Xiaobei Cheng, Chong Bai, Xiaoguang Zhang, Zihao Liu                                                                                |    |
| Soil Heavy Metal Source Tracing in Farmland Based on the Hybrid Model of APCS-MLR a<br>nd Machine Learning SVR: A Case Study of Huayuan County, Hunan Province.....  | 13 |
| Fang Zheng, Bozhi Ren                                                                                                                                                |    |
| Removal of Aldehydes and HCN from Cigarette Smoke Using Amino Acid Ionic Liquids.....                                                                                | 14 |
| Peijian Sun, Zhe Jin, Chengzhe Cui, Bin Peng, Yipeng Wang, Jizhao Guo, Chao Wang, Xuehui Sun                                                                         |    |
| Functionalized Carbon Adsorbents via Ball Milling for Enhanced Removal of Toluene.....                                                                               | 15 |
| Mantang Chen, Zhe Jin, Feng Li, Ranran Cao, Cong Nie, Xuehui Sun, Xiaoyu Wang,<br>Peijian Sun, Bin Peng, Chao Wang, Yipeng Wang                                      |    |
| Identification of Aerosol Types over Changchun Using AERONET and Low-Cost Sensor Data .....                                                                          | 16 |
| Yuliia Yukhymchuk, Gennadi Milinevsky, Xuhui Gao, Xuanyi Wei                                                                                                         |    |
| Dust Storm Events in Northeast China by Ground Based, Satellite and GEOS-Chem Modeling Data.....                                                                     | 17 |
| Gennadi Milinevsky, Xuanyi Wei, Yuliia Yukhymchuk, Xuhui Gao, Andrew Klekociuk                                                                                       |    |
| Deep Ground•Collaboration•Integration and Intelligence: Development Trends and Strategic<br>Reflections on China's Unconventional Natural Gas .....                  | 18 |
| Yu Yuanjiang, Zhao Qun, Chen Yanpeng, Yang Xuefeng, Shi Zhensheng, Zhang Deliang,<br>Zhou Tianqi, Huang Shan, Sun Shasha, Zhang Chenling, Liu Yuyang, Cao Lieyan     |    |
| Effect of Modified Waste Rubber Particles on the Properties of 3D-Printed Concrete .....                                                                             | 20 |
| Shengtian Zhai, Heng Shi, Xiaolong Niu                                                                                                                               |    |
| Enhanced Nitrogen Removal Performance of Nitrogen-Containing Domestic Wastewater Using<br>Tourmaline/Biochar Synergistically Modified Fillers .....                  | 21 |
| Ying Li, Wei Chen, Xiulei Fan, Jiaqi Zhang, Ying Pan, Shu Zhang, Wenjie Wang,<br>Xiangyun Li, Qian Wang, Siru Xing, Shuoyan Liu                                      |    |
| Effect of Polyvinyl Alcohol Fiber Content on the Frost Resistance of Recycled High-Ductility<br>Cementitious Composites .....                                        | 22 |
| Wang Xinjie, Md Taufiq Ahmed, Yan Xiancui, Yang Lei, Xu Bo                                                                                                           |    |
| Influence of Fluid Compressibility on Pore Water Pressure Response in Shanghai Soils Under<br>Complex Stress Paths .....                                             | 23 |
| Jia-Bin Li, Ming-Guang Li, Liang Zhen                                                                                                                                |    |

|                                                                                                                                                                  |    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|
| High Entropy LDH Catalyst Derived from Electroplating Wastewater for Durable H <sub>2</sub> O <sub>2</sub> Activation<br>and Organic Pollutant Degradation ..... | 24 |
| Hanwen Wang, Xiao Jin Yang                                                                                                                                       |    |
| Traffic Flow Prediction Based on a Deep Spatiotemporal Convolutional Hybrid Network .....                                                                        | 25 |
| Ping Zhang                                                                                                                                                       |    |
